

# Cat<sup>®</sup> Radios

## New Cat<sup>®</sup> Radios Incorporate Today's Technology and are Built Tough for the Most Rugged Environments

Just as you do with any other part or component, you should consider the durability of a radio. A car radio isn't durable enough to withstand the vibrations and other extremes of heavy equipment work sites.

Cat radios and accessories are designed to withstand the toughest applications in machines, on-highway trucks, boats or private sector use. They also are designed to withstand both hot and cold temperature extremes, ensuring operation at all times.

You can choose from four models, from a basic AM/FM receiver to a premium radio that includes satellite, Bluetooth, MP3, USB, auxiliary port, and more. Three new models feature a larger knob and a large twelve character digital display for improved visibility, allowing for quick and easy operation. Other popular features include a phone control button for easy access, multi-colored buttons, built-in Quartz Alarm Clock, and a large acrylic lens to protect the display.

# Cat Radios

## All models give you the following benefits:

- Reduced replacement costs: Shock and vibration resistant and works in extreme temperatures
- Worldwide frequency: Usage anywhere in the world
- Enhanced job site safety: Weather band keeps you updated with weather alerts
- Easy operation: LED lighted display, one button scan, seek up/down, 6 AM/18 FM presets
