

Cat® Enhanced Sealed and Lubricated Track (SALT) Undercarriage

Setting the Industry Standard for Conventional Undercarriage Systems

Formally known as Hybrid, Cat® Enhanced SALT undercarriage components help you get the most out of one of the biggest investments you make in your track-type machines - undercarriage maintenance and replacement. Cat Enhanced SALT undercarriage components reduce operating costs by increasing link and roller wear life. These high quality, field tested components set new limits for endurance and system life. Used with Cat shoes and sprockets, these components provide optimum system wear balance and the lowest cost per hour.

Cat® Enhanced Sealed and Lubricated Track (SALT) Undercarriage

Designed to Last

Enhanced SALT undercarriage components are designed to be turned/resealed to enhance the life of your undercarriage.

Features & Benefits

- Utilizes a tall link design from Track Type Loaders which offers increased wear life over conventional Sealed and Lubricated Track.
- Pin retention from elevated Track Type Tractors provides improved sealability from better pin and bushing retention.
- Link design incorporates enhanced spalling resistance.
- Enhanced serviceability of seals improves sealing system, to provide longer joint life.

Availability

Enhanced SALT components are available for 953, 963, and 973 loaders and D5, D6, and D7 tractors. For the greatest increase in system wear life, Cat Enhanced SALT undercarriage links, rollers, and idlers should be used together with new Cat rollers and idlers. They provide optimum system balance and lowest cost per hour when used with Caterpillar shoes and sprockets.

Recommended Models	Pitch
D5H/953	7.50" Pitch
D6H/963	8.00" Pitch
D6G, D6E, D6D, D6C	8.00" Pitch
Excavators 225, 229, 231, 23	8.00" Pitch
Feller Buncher FB227	8.00" Pitch
D7H/D7G/973	8.50" Pitch

A partnership to extend life

Enhanced SALT undercarriage is just one of the many application specific undercarriage systems we offer. Our Custom Track Service (CTS) specialists can analyze your application and tell you if Enhanced SALT components can improve your undercarriage wear life—and lower your cost per hour. Call us today to learn more.

CAT® DEALERS DEFINE WORLD-CLASS PRODUCT SUPPORT.

We offer you the right parts and service solutions, when and where you need them.

The Cat Dealer network of highly trained experts can help you maximize your equipment investment.
