

Oil Safe Containers

Protect Fluid Quality—Reduce Contamination

Recognize this?

Poorly stored fluids can become contaminated and will lead to accelerated component wear and robs equipment of efficiency.

Oil Safe Way

- Protects fluids from contamination
- Prevents spills from open containers
- Reduces accidents
- Allows easy access to hard to reach locations
- Durable
- Manually control flow rate

CATERPILLAR®

Oil Safe Fluid Defense System

Fluid Contamination

Oil exposed to air immediately becomes contaminated.

Poorly stored fluids will become contaminated and will lead to accelerated component wear, like:

- Shorten component and fluid life
- Catastrophic failures and costly downtimes and repairs
- Reduced Productivity

System efficiency can drop

20% before the operator detects a problem. That is a LOSS of ONE DAY PER WEEK.

It only takes a half of a teaspoon of dirt to contaminate a 55-gallon drum of fluid

Features & Benefits

- Available in 5 sizes: 1.5L, 2L, 3L, 5L, and 10L
- Interchangeable lids and drums
- Sold separately or in a kit
- Quick twist spout is easy to open and close; it controls flow rate and keeps dirt out
- Semi-transparent cylinder with graduated markings make liquid levels easy to see
- Durability tested
 - Withstands extreme temperatures ranging from -40°(F) to 176°(F)
 - Flash Point at 340° Celsius / 644° Fahrenheit
 - Manufactured from High Density Polyethylene (HDPE) incorporating anti-static
 - Agents and ultraviolet (UV) stabilizers.
- Vent control with button in handle

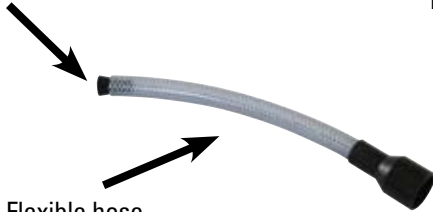

Oil Safe Fluid Defense System

Pump

Long hose pump fluids into difficult locations

Sealing cap keeps dirt out

Flexible hose

Stretch Hose Extension

Cat
Seals when not in use

Utility Lid

Use with an Oil Safe Pump for easy access to hard-to-reach places

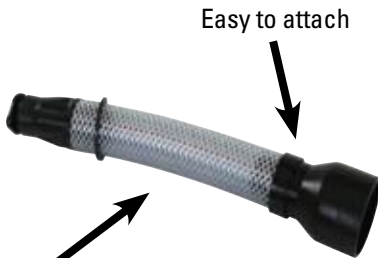

Quick close spout controls flow and keeps dirt out

Robust handle for easy handling

Stretch Spout Lids

Long spout is ideal for precise pouring and to prevent accidental spills

Easy to attach

Can be pulled from fitting and the length cut to suit the application

Stumpy Hose Extension

Drums

Extra wide mouth for easy refilling
Easy grip handle
Semi-transparent cylinder with graduated markings

Push button air intake for quick pouring

Available in 5 different colors

Stumpy Spout Lids

The 1" spout opening is ideal for applications where a higher lubricant flow is required

Oil Safe Fluid Defense System

Starter Kit includes:

- Pump
- 3 Liter Drum
- 5 Liter Drum
- 10 Liter Drum
- Stretch Hose Extension
- Yellow Stumpy Spout Lid
- Blue Stretch Spout Lid
- Red Utility Lid
