

Paints

Quality, Value-priced Paints from Caterpillar

- For dealers in Europe, Africa and the Middle East (EAME), we have introduced an improved ordering process, linked to a European-based supplier distribution, reducing delivery times.
- Your painting needs can now be met with paints from Caterpillar in a range of colors, types and finishes.
- Enamels, urethanes, thinners and specialty products offer a single-source solution for painting equipment, machinery, buildings and more.
- Aggressively priced and available in bulk and aerosol containers with no restrictive order requirements, these paint products are formulated to meet Caterpillar® engineering specifications for performance and durability.
- Each container comes labeled with documentation to satisfy global hazardous material warning regulations.
- Grow your parts business with Caterpillar paints.

Caterpillar Paint Categories

Category A, E, F, G & N Solvent & Water Reducible Enamel Topcoats

Caterpillar Enamel Paint is a pure, lead-free industrial enamel suitable for exterior or interior use on earthmoving, construction and material handling equipment, trucks, engines, machinery and metal buildings. This enamel is formulated to produce a finish that sets up in minutes, is tack-free in a few hours and dries overnight to a hard film resistant to fading, chalking and chipping. It can be applied directly to either metal or wood without using a primer.

Category H & C Primer Paint

Caterpillar Yellow Primer Paint is a pure, lead-free rust-inhibiting industrial primer sealer with excellent adhesion and durability. It is specially formulated to resist rusting, peeling and fading. It dries tack-free in a few hours and overnight to a hard, durable coating with excellent weather resistance. It should be recoated with Caterpillar enamel topcoat paint.

Category K Yellow Urethane Paint

Caterpillar Yellow High-gloss Urethane Paint is a specially formulated lead-free industrial 2K polyurethane for repairing or touching up urethane finishes. It provides excellent adhesion to a urethane finish when the surface is properly sanded and prepared. It produces a finish that sets up in minutes, is tack-free in a few hours, and dries overnight to a hard, high-gloss finish very resistant to fading, chalking, cracking and chipping. It is recommended for equipment exposed to the elements where long-term outdoor durability is required.

Category O

Paint & Primer Thinner

Caterpillar Paint & Primer Thinner is an excellent solvent for use with Caterpillar enamel paint and primer. It leaves the film quickly and will not impair the setting-up or tack-free time of the enamel or primer paint. This thinner's rapid evaporation makes it less likely to cause sagging and running. Due its high solvency, a relatively small amount is needed to reduce paint to a spray consistency.

Category P Paint & Primer Thinner with Retarder

Caterpillar Paint & Primer Thinner with Retarder is an excellent solvent for use with Caterpillar enamel paint and primer. It leaves the film slowly to provide flow and leveling in hot or dry conditions and on large equipment where slower drying is desired. This thinner evaporates slowly, making it less likely to cause dry over-spray. Due to its high solvency, a relatively small amount is needed to reduce paint to a spray consistency.

Category M Urethane Paint Reducer

Caterpillar Urethane Paint Reducer is specially formulated for use with Caterpillar urethane paint. It is an excellent thinner for cleaning and flushing spray equipment after application use. Due to its high solvency, a relatively small amount is needed to reduce paint to a spray consistency.

Category B Paint & Decal Remover

Caterpillar Paint & Decal Remover quickly removes paint, decals, varnishes, lacquers,

Each container comes with documentation to satisfy global hazardous material warning regulations.

enamels and synthetic finishes on metal and wood without damaging the surface. It is formulated for use as packaged; no further dilution is necessary. Do not use on plastics, vinyl, linoleum, fiberglass or synthetic fibers.

Category D Black Muffler Paint

Caterpillar Black Muffler Paint is formulated to resist temperatures up to 1,000° F. Once properly cured, it forms a hard, lasting finish that resists salt spray and will not chip or peel. It is ideal for use on mufflers, exhaust systems or any surface exposed to very high heat.
