Discover the Difference

Formulated with polyurea thickener and corrosion inhibitors, Cat® Ball Bearing Grease provides excellent lubrication in ball and roller bearings operating over a broad temperature range.

**High-Stress Performance** — Provides outstanding protection at high speeds (10,000 rpm and greater) and the high temperatures (160°C/320°F) associated with high-speeds.

**Increased Component Life** — Heat resistance provides improved protection, reducing component wear rates.
Recommended Use
Cat Ball Bearing Grease can be used for high-speed ball-, needle- and sealed-bearing applications such as:
• electric motors
• fan drives
• starters
• alternators
• generators
It can also be used in automotive and industrial applications, especially where equipment is operated intermittently in severe conditions.

Health and Safety
For information on proper use for health, safety and environment, please refer to the Material Safety Data Sheet (MSDS). Read and understand the MSDS before using this product. Always observe good hygiene measures. For a copy of the MSDS, contact us or visit the web at www.catmsds.com.

CAT DEALERS DEFINE WORLD-CLASS PRODUCT SUPPORT.
We offer you the right parts and service solutions, when and where you need them.

The Cat Dealer network of highly trained experts keeps your fleet up and running to maximize your equipment investment.

BUILT FOR IT.
