

Cat[®] Reman Cylinder Packs

Fast, Dependable and Affordable Overhaul Options

Your Caterpillar[®] engine is at the heart of your truck's productivity and your company's profitability. Whether you require simple component repair or more complicated engine replacement, Cat[®] Reman Engines and engine components can get you back to work quickly with reliable, lower-cost solutions.

Cat Reman Cylinder Packs ensure your engine is overhauled using performance-matched, genuine Caterpillar parts. Only Caterpillar preassembles the connecting rod, liner and piston as a unit, cutting overhaul time by as much as 25 percent.

Factory Reman Ensures Reliability

Cat Reman Engines and components are factory-remanufactured, using genuine Caterpillar parts, and include all critical engineering updates. Each engine and component is tested extensively to ensure same-as-new performance at fraction-of-new prices. See your Cat Dealer today for the broadest line of remanufactured parts and components in the industry, supported by Caterpillar's worldwide inventory and distribution system.

Caterpillar. The difference counts.™

The highly trained experts at your Cat[®] Dealer and authorized Cat parts and service locations define world-class product support by offering you the right parts and service solutions, when and where you need them.

We keep your on-highway engine up and running to maximize your investment.

Cat Reman Cylinder Packs

"Reman is the only thing I'll use in my truck."
— Owner/Operator F. Lee Wood

Maximum Productivity and Lower Costs: 1,000,000 Miles on Cat Reman Cylinder Packs

F. Lee Wood maintains lower operating costs on his Kenworth by using genuine Caterpillar Reman products:

- Lee's truck is powered by a Cat 3406—7FB09256.
- Oil changes—every 10,000 miles with Shell Rotella
- An in-frame overhaul using Cat Reman Cylinder Packs was performed at 800,000 miles.
- Lee's truck had 1,800,000 miles at the time of his second in-frame overhaul. The pack you see pictured below has 1,000,000 miles of service and revenue work behind it!

Caterpillar Reman Products are engineered for dependability, at a fraction of the cost of new parts.

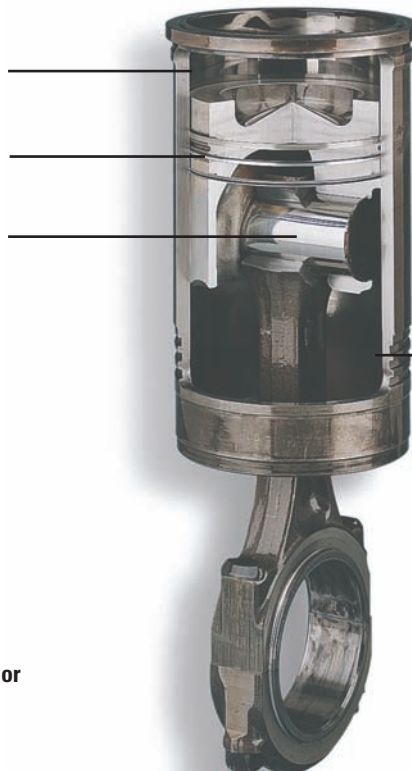

No cracks or fuel erosion in the piston crater.

Rings were all loose and floating.

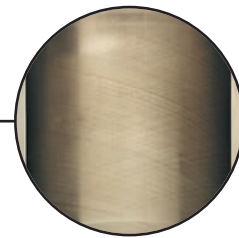

No bronze transfer from the bushing to the pin. No wear step or polishing on the pin. No fretting or erosion on pin from retainer clip.

Packs come fully assembled, ready to install—that keeps downtime and repair costs to a minimum.

For more information, see us today or visit our Web site at www.cat.com

Though the crown has been cleaned of all loose carbon, the injector spray pattern is still visible.

Crosshatching is still visible.
