

Reman Piston Packs

Reman Piston Packs feature an assembled connecting rod, piston, and piston rings. Rings are compressed inside an installation tool.

Reduce downtime and costs with preassembled Cat® Reman Piston Packs

To help reduce overhaul time and costs, Caterpillar has developed Reman Piston Packs for 3116 and 3126 engines.

- Easy to install—piston rings are compressed inside an installation tool
- Save you money—you get same-as-new quality and warranty at 50% the cost of new parts
- Save you time—there's no need to disassemble, clean, and inspect the removed piston and rod assembly for reusability

Plus, Cat Reman Piston Packs feature performance-matched, genuine Caterpillar® parts to help ensure you get the most out of your engine.

Reman Piston Packs

Installing Cat Reman Piston Packs is fast and easy with a preassembled connecting rod, piston, and piston rings (rings compressed inside an installation tool).

Remove piston/rod assembly.

Inspect the parent bore.

Use the installation tool to install the Reman Piston Pack quickly and easily.

Reliable, performance-matched components

Cat Reman Piston Pack components for 3116 and 3126 engines are remanufactured to same-as-new quality for superior performance and reliability. The connecting rod at the heart of a Cat Reman Piston Pack is checked for cracks, bend and twist, and all other critical features. The crank end is resized to new part specifications. Each Cat Reman Piston Pack also features:

- Rebushed or replaced pistons (depending on design)
- New piston rings
- New or remanufactured piston pin
- New piston retainers
- Installation tool hardware

Simple, easy core exchanges

Exchanging Cat Reman Piston Packs is simple and requires no special tools. To receive a full refund, a Cat Piston Pack core must:

- Have an acceptable Caterpillar part number
- Have a matched rod and end cap
- Be fully assembled and complete
- Have an unbent, unbroken connecting rod

Quick, affordable repair service and options

Cat Reman Piston Packs get you back to work reliably, affordably, and quickly. Other time- and cost-saving Reman products for medium-duty engines include:

- Bare blocks with all bores returned to standard
- Oil coolers
- Crankshafts
- Fuel injectors
- Camshafts
- Rocker arms
- Starters and alternators
- Turbochargers
