

# Cat® Reman Coverage for Track-Type Tractors

## Remanufacturing ensures a lifetime of value

When you buy a Caterpillar® Track-Type Tractor (D7R - D11R), you buy a lifetime of value. This remains true even when it comes time to replace certain components. New Caterpillar Track-Type Tractor components are built to be remanufactured for a second life. Cat Remanufactured products give you uniform quality in every

component because Caterpillar maintains top-level control during every cleaning, assembly, and testing process. Critical engineering updates are incorporated, so your remanufactured component has the same performance specifications as a new part—that goes for design, performance, availability, and support.

**This illustration represents typical Reman coverage for track-type tractors. We can provide specific coverage information.**

REMAN

## Keeping your owning and operating costs low; keeping the performance of your Cat Track-Type Tractor high

Reman options are one more way we support your equipment and help you to lower owning and operating costs. Cat Remanufactured products are typically priced at 40-60%<sup>1</sup> of new.

The core acceptance criteria for Caterpillar Remanufactured products is simple and visual—requiring no special tools. Plus, even when you think a component has no value left, you will often receive credit,

allowing Cat Reman products to cost a fraction of the price of new parts.

In addition, Cat Reman products have the same warranty as new Cat parts, further evidence of the quality built into every Reman product.

## Worldwide availability ensures superior service and support

Most Cat Reman products are available off-the-shelf. We stock the broadest line of remanufactured parts and components in the industry. And our inventories are

further supported by the Caterpillar worldwide inventory and distribution system. Many products are fully assembled and ready to install at your job site or in our shop.

Call us today to learn more about Caterpillar Remanufactured products and our core credit policy. We'll show you how Cat Reman products for track-type tractors help your machines run more efficiently at the lowest possible operating cost.

<sup>1</sup> Price percentages represent general ranges of suggested consumer prices and are based on the return of an acceptable core.

*Our remanufactured components—the most comprehensive line in the industry—help you to lower costs and ensure top machine performance for your track-type tractor.*
