

# Cat® Fast Fuel System Conversion Kits

## Flange-mounted receivers reduce fuel leaks and contamination

It's now faster and easier to change fast fuel receivers. That's because Caterpillar now offers kits to convert Cat or Wiggins fast fuel threaded receivers to flange-mounted receivers. So now many Cat machines—old or new, equipped with fast fuel systems—can benefit from greatly simplified field changes and a reduced risk of fuel leaks.

- **Less thread damage**—Because threaded receivers can be installed and removed several times a year, the tank port threads can become worn or damaged. This results in both fuel leaks and fuel contamination. With flange-mounted fast fuel receivers, worn receivers can be changed without replacing the reusable steel adapter...and without damaging the tank port threads.
- **No special tools**—A common Allen wrench easily removes and installs four bolts to change flange-mounted fast fuel receivers.
- **Two conversion kits**—One conversion kit is available for threaded receivers on Cat Fast Fuel Systems and another kit is designed for threaded receivers on Wiggins Fast Fuel Systems.

# Cat Fast Fuel System Conversion Kits

## Designed for convenience

Cat Conversion Kits contain all the parts necessary to replace a two-inch NPTF fast fuel receiver with a Cat Flange-mounted Receiver. Including a fuel tank adapter that threads into the existing fast fuel system's two-inch NPTF threaded inlet ports, plus mounting hardware. The split-flange design allows easy access for installation.

## Installation just got easier

- **Easy access.** A 10-mm Allen wrench removes the four bolts holding the two split flanges, so removal and installation can be performed with less clearance. There's no more need for large, cumbersome wrenches in tight conditions, as is the case when changing threaded receivers.
- **Compatibility.** Cat Flange-mounted Fast Fuel Receivers are compatible with existing Wiggins and other brands of fuel system nozzles without degradation of fuel flow or fuel nozzle shut-off valve performance. The fuel tank adapter accepts Cat Flange-mounted Fast Fuel Receivers and mounting flanges where space permits.
