

Tier 3 Repower Solution

For D10 N & R TTT

Emissions Repower Benefits:

- Significant reductions in engine out emissions
- EPA / CARB Certified engine
- Enables work in areas with site requirements for strict emissions levels
- Most cost effective technology to comply with state and federal emissions requirements
- Updated components similar to those found in D10T with comparable overhaul costs
- Preservation of comfort level with machine operation
- Funding may be available from local, state or federal sources
- 0% Financing available

CATERPILLAR®

Tier 3 Repower Solutions

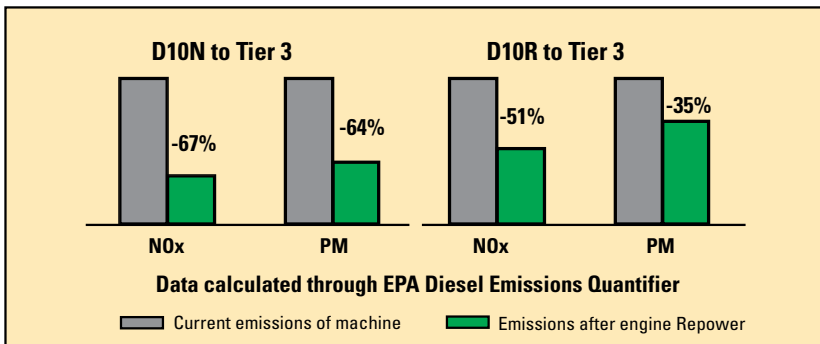

How it works:

Your Caterpillar Dealer will remove the existing engine and replace it with a lower emissions integrated Tier 3 solution.

Rating Match / Performance and Emissions:

- Longer Maintenance intervals (S•O•S should be used to confirm oil change interval)
- Matched to original Torque Converter / Transmission
- Repower engine performance is matched to original engine rating
- Engine Load Acceptance / Transient Response

Repower Features:

- Tier 3 – C27 ACERT Engine
- Engine monitoring / diagnostics
- On Demand Fan / Reverse Fan control
- New Wiring harness
- Improved Cooling System and components
- High Ambient Air Temperature capability
- Increased Resale Value
- Complete engineered solution
- All service parts supported through CAT parts system

CAT DEALERS DEFINE WORLD-CLASS PRODUCT SUPPORT.
