

Cat[®] Upgrade Retrofit Cabs

For Large Off-highway Trucks

A lot more cab in a lot less time

How do you keep large off-highway trucks in operation while, at the same time, upgrade their capabilities? The Cat[®] Retrofit Cab is a rebuild or replacement option that can help do both by providing upgrades and cutting installation time. Rebuild time for an outdated cab is normally measured in weeks, but Cat Retrofit Cabs can be installed in less than a day.

The fully assembled cabs are available for Cat 785, 789 and 793 B and C Series Off-highway Trucks, with an exterior paint scheme and markings similar to current production cabs. Each Cat Retrofit Cab includes:

- All new components (including Electronic Control Modules), ROPS and cab mounting hardware
- New, updated wiring harnesses
- New Vital Information Management System 4.0 (VIMS)
- Cat Comfort Seat with three-point restraint for the operator
- Full-size buddy seat

Cat® Upgrade Retrofit Cabs for Large Off-highway Trucks

Maximizing Time and Comfort

Cat Retrofit Cabs offer value by upgrading to newer technologies and assuring ROPS integrity. The cabs are equipped with VIMS 4.0 for better monitoring of truck operations and payloads. The “plug and play” design requires less than a day for installation, minimizing downtime. The Cat Comfort Seat with patented three-point harness improves operator comfort which, industry studies confirm, can:

- reduce fatigue
- promote safety awareness
- improve alertness
- have a positive impact on productivity

Retrofit Cab Cross-reference Chart

The information in this chart will help match the Retrofit Cab Upgrade Part Number to the truck application by machine sales model and serial number prefix.

Please note that all Retrofit Upgrade Cabs are VIMS 4.0 ready and include Comfort Seats with three-point operator restraint and comfortable, full-size buddy seats.

These Upgrade Retrofit cabs replace same series machine cabs, these cabs are not intended to upgrade from a lower series model.

The Retrofit Cabs that are compatible with Hydraulic Automatic Retarder Control (ARC) are 785C and 789C series. The Retrofit Cabs that are compatible with the Air ARC are 785B, 789B, 793B, and 793C.

Large Off-highway Truck	Serial Number	New Retrofit Cab Part Number	Original Cab Part Number
785B	6HK00433 and up	260-1831	114-9461
