

Retrofit Powered Access System

For Cat® 785C, 785D, 789C, 793D, 793D XQ, 793F, 797, 797B & 797F Mining Trucks

Improved Access

The newest Cat® powered access system retrofit kit expands coverage to include 797 and 797B. This attachment focuses on two customer concerns – safety and ergonomics. Cat powered access systems provide a full stairway (with hand rails) between the ground and the bumper platform, allowing easier access to the truck's primary stairs. This bumper to ground stairway folds up out of harm's way with the flip of a switch.

Retrofit Powered Access Systems

797-797B powered access system (442-1749) mounts to top of bumper for extra damage resistance in soft underfoot conditions.

Cat powered access systems for other Cat trucks mount at bumper level.

Coverage

Sales Model	Serial Numbers	Kit Part Number	Comments
785C	APX	363-8758	Requires 353-2780 Stairway Kit

Product Specifics

- Field installed attachment
- Caterpillar integrated and validated design
- Raise & lower from cab level or ground

For additional information please contact your local dealer.

Design Features

The powered access system is 600 mm (24 in) wide providing adequate space for all operators. Controls for the powered access system are located at cab level and bumper level. A conveniently located emergency release valve will lower the stairway to ground level in approximately three seconds should the truck become inoperable.

Reliability and Durability

The Cat powered access system offers customers an integrated solution designed for easy installation and long service life.

CAT DEALERS DEFINE WORLD-CLASS PRODUCT SUPPORT.

We offer you the right parts and service solutions, when and where you need them.
