

New Guardrail Retrofit Kit

For Cat® D10R, D10T, D11R and D11T Track-Type Tractors

Caterpillar is pleased to announce the availability of a Guardrail retrofit kit for many D10 and D11 Track-Type Tractor models. Heavy-duty fender guardrails are strategically placed to aid operators getting on and off the machine and provide safer access to service points located on the left and right fenders.

Cat® Retrofit Kit - Guardrail

Machine Coverage

Machine Model/ Serial Number Prefix
D10T (RJG)
D11T (GEB) D11T CD (TPB)
D10R ((3KR, AKT) D11R (9TR, 8ZR, 7PZ) D11R CD (9XR, AAF)

If a D11R (7PZ, 9TR, 8ZR, 9XR) or D11T (GEB/TPB) has been retrofitted or equipped (factory ordered) with a powered access ladder OR with a rear access platform, there is no need to order these LEFT hand side guardrails for retrofit, since the ladder includes a left hand side guardrail. It is still possible to install the RIGHT hand side guardrails as retrofit.

If a D10T has been retrofitted or equipped (factory ordered) with a ladder or a rear access platform, both left and right hand side guardrails are already included. No guardrail retrofit is needed.

Please refer to below marketing material information for more details on powered access ladder retrofit.

Powered Access ladder for D10T: Refer to IRM: PELJ1240.

Powered Access ladder for D11R and D11T: Refer to IRM: PELJ1151.
