Cat® Certified Rebuild Upgrade
For 785, 785B, 789, 789B Off-Highway Trucks

Boost your productivity and reduce your operating cost with Cat® Certified Rebuild Upgrade

You invested in Cat quality when you bought your machine. With a Cat Certified Rebuild Upgrade (CCRU) you can improve the fuel economy, performance and productivity of your original machine by adding all of the advancements of the equivalent C-Series truck model.

CCRU is a Caterpillar process that both revitalizes your truck to factory new conditions as well as upgrades the performance of your truck to C-Series levels. This includes Vehicle Information Management System 4.0, a US EPA Tier 1 3500B series engine, higher horsepower, potential fuel savings, modernized operator compartment, and extended service intervals.
