GENUINE CAT® PUMPS AND MOTORS

GENUINE CAT® PUMPS AND MOTORS:

- Designed for Caterpillar, built for optimal Cat machine performance
- Durable and reliable
- Supported by world class dealers

Don't wait for failure – this can lead to unplanned downtime and additional costs. Be sure to look out for the warning signs that include excessive noise or vibration.

CAT[®]
LET'S DO THE WORK.™

GENUINE CAT[®] PUMPS AND MOTORS. REAL BENEFITS.

ROBUST DESIGN. PRECISION CONSTRUCTION.

Cat[®] hydraulic pumps and motors are designed and manufactured to meet the demanding requirements of Cat equipment, with durable, high-end materials and precision tolerances.

GEAR PUMPS

Used in open-centre applications that require increased pressure and temperature capabilities, Cat gear pumps are optimised with rugged journal bearings, high-pressure end plates and high-temperature seals that extend component life.

VANE PUMPS

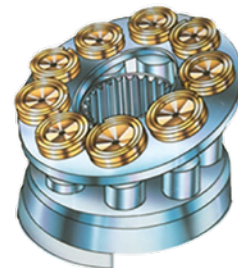

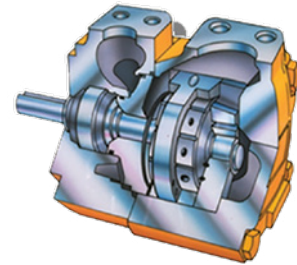

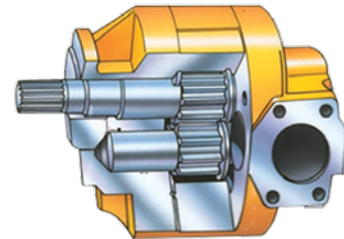

Used in open-centre applications, Cat vane pumps feature a refined design of the cam-rings, pressure plates and pressure seals to withstand tougher duty cycle requirements, including increased pressure limits.

PISTON PUMPS

Highly refined to satisfy the demand for increased hydraulic system efficiency, longer service life and improved overall value, every Cat pump model is customised to optimise performance and life for its intended application.

FEATURES:

- Simple and rugged
- High resistance to contamination
- Durable and reliable two-piece cast iron vs. three-piece aluminium design helps to prevent shaft seal leaks that may result from impact
- Smaller units use valves to improve hydraulic system integration
- Available in fixed displacement
