

YOUR BUCKET. YOUR CHOICE.

You may not have a Cat® bucket on your machine. But you can still have Cat Ground Engaging Tools (GET) — and everything that comes with them — through the **Fleet Bucket Program**.

Customization

Reliability

Availability

Support

Knowledge

Your Cat dealer can deliver GET products that range from the smallest construction equipment to the largest mining machines — matched with service, support and consultation to keep your operation running smoothly and profitably.

INTRODUCING THE FLEET BUCKET PROGRAM

The Fleet Bucket Program gives you access to Cat GET solutions no matter who manufactured your machine or your bucket. And the benefits go well beyond the customization and quality of our GET.

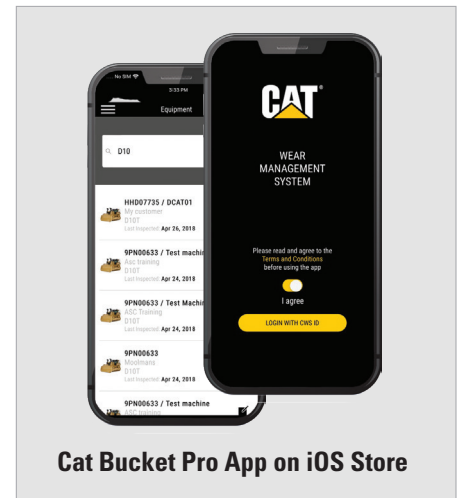

By joining the Fleet Bucket Program, you'll have access not only to boots-on-the-ground service and repair capabilities, but also to expertise. We do more than support products. We support productivity.

Ground Engaging Tools have a direct effect on your machine's ability to produce. And your Cat dealer will help you manage them well, working with you through the complete lifecycle of your buckets and your GET. They'll help you optimize performance through monitoring programs and wear analysis services that leverage state-of-the-art tools and technologies like Cat Bucket Pro.

Cat Bucket Pro is an app-based inspection tool matched with web analytics that your dealer will use to help you make informed decisions around bucket service or product improvement. Inspection reports reveal important information about the health of your buckets and the life of your GET.

- Simplify GET selection and management
- Align your GET inventory with known wear rates
- Optimize GET costs per bucket configuration
- Measure bucket performance and receive recommended improvements
- See performance/costs across your entire fleet

Ready to get started?

 **SELECT**
the right Cat GET products in partnership with your bucket manufacturer

 **CHOOSE**
your Inventory Plan with your Cat dealer
