

CAT® CAPSURE™

HAMMERLESS RIPPER TIP & SHANK PROTECTOR SYSTEM

QUALITY DESIGN. DEPENDABLE RESULTS.

The foremost benefit of Cat® CapSure™ technology is improved safety due to the hammerless design retention technology. The ripper tip and shank protector are easily installed with a 180 degree turn of a $\frac{3}{4}$ inch ratchet.

The CapSure retainer is installed in the ripper tip and shank protector, and a positive stop is cast into the retainer to eliminate the possibility of over rotation.

The simple installation means no hammering of pins and therefore improved safety. It equates to quicker replacements and less machine downtime.

This system has also been designed for increased wear material on the tip and shank protector in key areas where excessive wear occurs.

CapSure ripper tips and shank protectors can be used on a Cat ripper shank without any modifications. CapSure ripper tips are available for D4-D11 dozers and all motorgraders. CapSure shank protectors are available for D7-D11.

BENEFITS

BETTER PROTECTION. BETTER PERFORMANCE. BETTER SERVICEABILITY.

- + Eliminates hammering of traditional pins
- + Uses standard $\frac{3}{4}$ " ratchet for installation / removal
- + Cast lift eyes for safer handling*
- + Helps optimize wear life of shank protector
- + Retainer is integral part of the tip & protector

*D8-D11 ONLY

CAT® DEALERS DEFINE WORLD-CLASS PRODUCT SUPPORT.

We offer you the right parts and service solutions, when and where you need them.

The Cat Dealer network of highly trained experts keeps your entire fleet up and running to help maximize your equipment investment.
