

BE AWARE OF YOUR WEAR

PLAN YOUR MAINTENANCE WITH THE CAT® TRACK WEAR SENSOR.

The new Cat® Track Wear Sensor remotely monitors track link wear to better predict wear out, improve maintenance planning and minimise downtime for your Cat D6 Dozer.

- Patented innovation, exclusive to Cat machines and Cat undercarriage
- Automated alerts at 40%, 70% and 100% wear intervals to help you plan for maintenance or replacement
- Increase your fleet coverage with automated inspections and visibility in remote locations
- Available for Cat D6 Dozer HDXL undercarriages and can be retrofitted on eligible dozers.

To find out more or to book a free* undercarriage inspection, contact your local Cat dealer or visit cat.com/undercarriage-au

CAT[®] TRACK WEAR SENSOR

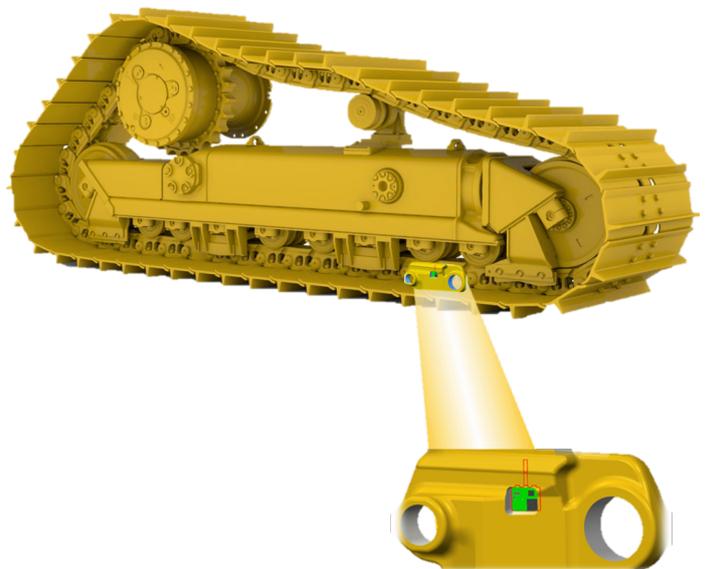

The Cat[®] Track Wear Sensor is designed to trigger notifications at certain wear intervals. The 'no-touch' track link measurements help make service and maintenance more convenient.

HOW IT WORKS:

The Cat Track Wear Sensor is installed in a customised pocket in the track link. As the track link is worn down, the track wear sensor monitors the amount of wear.

The Cat Track Wear Sensor communicates that critical wear information about the track link from the machine. It sends information wirelessly to the Cat Wear Management Software, where the status can be monitored by you and your Cat dealer.

EXPECT ALERTS DURING THE FOLLOWING INTERVALS:

- **40%: Alert for bushing turns**
- **70%: Signal to schedule an inspection**
- **100%: Replacement needed**
